We keep it simple. We are fully self-contained: we bring our own PA, a Bose L1 Pro Compact with a Bose mixer (plus a smaller rig for tighter rooms), and we mix ourselves from the stage. No monitors; we run off our own stage sound, so load-in is light and sound check is quick. What we need from you is **two power outlets near the stage** and a playing area about 10 by 8 feet. Running your own front of house? We will hand your engineer a clean stereo line from our mixer, two channels, already mixed, or we are glad to run the room ourselves.

INPUT LIST

#	SOURCE	INPUT
1	Allison	Fiddle, LR Baggs Anthem pickup (DI)
2	Maurie	Guitar, LR Baggs Anthem pickup (DI)
3	Kevin	Guitar, LR Baggs Anthem pickup (DI)
4	Allison	Vocal, mic (band supplies)
5	Maurie	Lead vocal, mic (band supplies)
6	Kevin	Vocal + harmonica, mic (band supplies)

Those six channels are the whole show if you are supplying the PA. Every so often we go out as a five-piece with bass and drums; give us a heads-up and we will send the bigger input list and plot.

STAGE PLOT (AUDIENCE VIEW)
